

LOCKING BIN STANDS

Lock away bins in public areas for extra security and empty easily with key access.

OSGS Locking stands are tried and proven to be the most durable on the market. Made from either galvanized steel or double powder coated, the spring loaded locking mechanism 'snaps' your bin by the handle firmly, and holds your bins where you want them. Bins kept in OSGS Locking stands are not often taken by theft.

- Reduces Bin Lid opening to prevent disposal of oversized waste
- Birds and Vermin cannot get into the bin when locked its stand
- Base Plate can be easily mounted to concrete or paved areas
- Galvanized locking stands are perfect for coastal areas and are protected from corrosion
- Double Powder coating is hardened for extra strength in public locations
- Wall mounted locking stands are also available
- Double and single for both 120 litre and 240 litre MGBs
- Springs mechanism is made from stainless steel
